

## NON WOVEN SHOE COVER

### PRODUCT SPECIFICATION

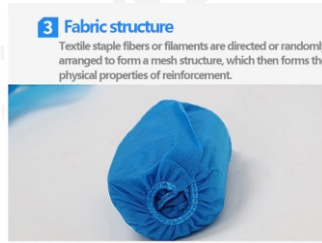

**1 Non-woven fabric**

Made of non-woven fabric, can directly touch the skin, more cost-effective!

**2 Comfortable breathe freely**

Due to the permeability of non-woven material itself, so that the feet can "breathe" "not" "hold your breath"

**3 Fabric structure**

Textile staple fibers or filaments are directed or randomly arranged to form a mesh structure, which then forms the physical properties of reinforcement.

**4 Anti cracking**

The two ends of the shoe cover are fine sealing design, neat wiring, effectively prevent the shoe cover from cracking.
